

Añadir Unidades organizativas:

```
New-ADOrganizationalUnit -Name "OU1" -Path "DC=startup,DC=local"
New-ADOrganizationalUnit -Name "OU2" -Path "DC=startup,DC=local"
New-ADOrganizationalUnit -Name "OU3" -Path "DC=startup,DC=local"
```

```
PS C:\Users\Administrador> New-ADOrganizationalUnit -Name "OU1" -Path "DC=startup,DC=local"
New-ADOrganizationalUnit -Name "OU2" -Path "DC=startup,DC=local"
New-ADOrganizationalUnit -Name "OU3" -Path "DC=startup,DC=local"
```

Crear usuarios:

```
New-ADUser -Name "Juan Perez" -SamAccountName jperez -AccountPassword (Read-Host -
AsSecureString "Password") -Enabled $true -Path "OU=OU1,DC=asir,DC=local"
```

```
New-ADUser -Name "Maria Lopez" -SamAccountName mlopez -AccountPassword (Read-Host -
AsSecureString "Password") -Enabled $true -Path "OU=OU1,DC=asir,DC=local"
```

```
New-ADUser -Name "AdminCarlos" -SamAccountName acarlos -AccountPassword (Read-Host
-AsSecureString "Password") -Enabled $true -Path "OU=OU2,DC=asir,DC=local"
```

```
New-ADUser -Name "Diana Torres" -SamAccountName dtorres -AccountPassword (Read-Host
-AsSecureString "Password") -Enabled $true -Path "OU=OU2,DC=asir,DC=local"
```

```
New-ADUser -Name "Luis Admin" -SamAccountName ladmin -AccountPassword (Read-Host -
AsSecureString "Password") -Enabled $true -Path "OU=OU3,DC=asir,DC=local"
```

```
PS C:\Users\Administrador> New-ADUser -Name "Juan Perez" -SamAccountName jperez -AccountPassword (Read-Host -AsSecureString "Password") -Enabled $true -Path "OU=OU1,DC=startup,DC=local"
New-ADUser -Name "Maria Lopez" -SamAccountName mlopez -AccountPassword (Read-Host -AsSecureString "Password") -Enabled $true -Path "OU=OU1,DC=startup,DC=local"
New-ADUser -Name "AdminCarlos" -SamAccountName acarlos -AccountPassword (Read-Host -AsSecureString "Password") -Enabled $true -Path "OU=OU2,DC=startup,DC=local"
New-ADUser -Name "Diana Torres" -SamAccountName dtorres -AccountPassword (Read-Host -AsSecureString "Password") -Enabled $true -Path "OU=OU2,DC=startup,DC=local"
New-ADUser -Name "Luis Admin" -SamAccountName ladmin -AccountPassword (Read-Host -AsSecureString "Password") -Enabled $true -Path "OU=OU3,DC=startup,DC=local"
```

Buscar usuarios que contengan “Admin”

```
Get-ADUser -Filter "Name -like '*Admin*'" -Properties *
```

```
PS C:\Users\Administrador> Get-ADUser -Filter "Name -like '*Admin*'" -Properties *

MODIFICAR PROPIEDADES (EMAIL)

```
Set-ADUser -Identity jperez -EmailAddress "juan.perez@asir.local"
```

```
PS C:\Users\Administrador> Set-ADUser -Identity jperez -EmailAddress "juan.perez@asir.local"
```

CREAR GRUPOS DE SEGURIDAD

```
New-ADGroup -Name "Grupo1ASIR" -GroupScope Global -GroupCategory Security -Path
"OU=OU1,DC=asir,DC=local"
```

```
New-ADGroup -Name "Grupo2ASIR" -GroupScope Global -GroupCategory Security -Path
"OU=OU2,DC=asir,DC=local"
```

```
PS C:\Users\Administrador> New-ADGroup -Name "Grupo1ASIR" -GroupScope Global -GroupCategory Security -Path "OU=OU1,DC=startup,DC=local"
New-ADGroup -Name "Grupo2ASIR" -GroupScope Global -GroupCategory Security -Path "OU=OU2,DC=startup,DC=local"
```

Asignar usuarios a los grupos

```
Add-ADGroupMember -Identity "Grupo1ASIR" -Members jperez, mlopez, acarlos
Add-ADGroupMember -Identity "Grupo2ASIR" -Members dtorres, ladmin, jperez
```

```
PS C:\Users\Administrador> Add-ADGroupMember -Identity "Grupo1ASIR" -Members jperez, mlopez, acarlos
Add-ADGroupMember -Identity "Grupo2ASIR" -Members dtorres, ladmin, jperez
```

ELIMINAR UN USUARIO DEL GRUPO Grupo1ASIR

```
Remove-ADGroupMember -Identity "Grupo1ASIR" -Members jperez -Confirm:$false
```

```
PS C:\Users\Administrador> Remove-ADGroupMember -Identity "Grupo1ASIR" -Members jperez -Confirm:$false
```

CREAR OU "Usuarios" y "Estudiantes"

```
New-ADOrganizationalUnit -Name "Usuarios" -Path "DC=asir,DC=local"
New-ADOrganizationalUnit -Name "Estudiantes" -Path "DC=asir,DC=local"
```

```
PS C:\Users\Administrador> New-ADOrganizationalUnit -Name "Usuarios" -Path "DC=startup,DC=local"
New-ADOrganizationalUnit -Name "Estudiantes" -Path "DC=startup,DC=local"
```

MOVER USUARIOS ENTRE OU

```
Get-ADUser jperez | Move-ADObject -TargetPath "OU=Estudiantes,DC=asir,DC=local"
Get-ADUser mlopez | Move-ADObject -TargetPath "OU=Estudiantes,DC=asir,DC=local"
```

```
PS C:\Users\Administrador> Get-ADUser jperez | Move-ADObject -TargetPath "OU=Estudiantes,DC=startup,DC=local"
Get-ADUser mlopez | Move-ADObject -TargetPath "OU=Estudiantes,DC=startup,DC=local"
```

BUSCAR EQUIPOS WINDOWS 10 o WINDOWS 11

```
Get-ADComputer -Filter "OperatingSystem -like '*Windows 10*' -or OperatingSystem -
like '*Windows 11*'" -Properties OperatingSystem
```

```
PS C:\Users\Administrador> Get-ADComputer -Filter "OperatingSystem -like '*Windows 10*' -or OperatingSystem -like '*Windows 11*'" -Properties OperatingSystem
```

DESHABILITAR CUENTA DE UN USUARIO

```
Disable-ADAccount -Identity acarlos
```

```
PS C:\Users\Administrador> Disable-ADAccount -Identity acarlos
```
